

# MUG/TUMBLER INSERTS

Looking to use the exciting lenticular medium to attract primarily business, manufacturing clients or hot beverage drinkers? Consider our insertable mug and tumblers. Lenticular mug and tumbler inserts are an alternative to the 16 ounce IML Cups. The same patented software as the IML Cup is used to insure a superior quality image once the slug is inserted into the curved cavity and behind the clear plastic wall of the mug or tumbler.
